

SUMMER Abroad

GOTTFRIED WILHELM LEIBNIZ
UNIVERSITÄT HANNOVER

Summer Engineering Internships and
German Language Study

LOCATION

Hannover is the heart of a region of about 1.2 million people and is surrounded by numerous lakes and forests. The city itself offers many parks and idyllic gardens, which add to the city's reputation for being a "green metropolis." It also boasts an attractive mixture of historic and modern architecture, especially in the old city center and its modern shopping areas.

PROGRAM DETAILS

This program involves an individual study or research project that is suitable for engineering students in general, and mechanical engineering students in particular. Each student is matched with a supervisor in a research lab or institute and is integrated into the research team. The academic aspect of this program is enhanced by an introduction week, regular meetings, and follow-up sessions with supervisors and fellow participants. An interesting cultural program complements the academic work, and German student study buddies help participants settle in. The German language component entails an intensive German language class during the orientation week, followed by 8 hours of instruction per week.

Eligibility: Junior-level standing.

Excursions: The program offers affordable trips to cultural events during the week (e.g., cinema, theater) and places of interest during weekends (e.g., national parks, the North Sea, Hamburg, Bremen).

COURSES AND CREDITS

The weekly workload includes 28 hours of research, 8 hours of language lessons, and 4 hours of roundtable seminars. Upon completion, students receive 6 ECTS (3 from the German language course). The transfer of credits depends on the home institution's policies.

GERMANY

with

HOUSING AND MEALS

Housing is available in a dormitory or with a host family. Students receive a monthly stipend in the amount of EUR 450 for housing and meals.

DATES

June 7 – July 30, 2010

ISEP-EXCHANGE COST

Program fee is based on tuition, housing, and meals at home institution. Plus a \$355 non-refundable application fee.

DEADLINE TO APPLY

March 1, 2010
