ISEP-Exchanges to the United States

Restricted Sites

You may list only one restricted site and it must be listed as your first choice. Any additional restricted sites will be disregarded. Please see the note regarding "consortia" below for further information on the New Jersey consortium.

Consortia

Students requesting placement at consortia in the United States (Georgia consortium, New Jersey consortium, Missouri consortium, North Carolina consortium) may list only one member institution from a particular consortium. While you may request a particular consortium member institution, the consortium may choose to confirm your placement at a different institution based on course availability.

Multi-campus Institutions

The following are multi-campus institutions: ITESM, Mexico.

When applying for a multi-campus institution, please list the campus you would prefer. However, the final placement decision is determined by the host institution. **Please note:** Not all academic fields offered by a multi-campus institution will be available on every campus; make sure that the fields of study you are requesting are available on the campus you list.

ISEP-Direct sites are marked with a **Ⓢ** in the ISEP *Membership Directory* and on the ISEP Web site; sites that are not marked with a **Ⓢ** are not available as ISEP-Direct placements. Each placement option should be listed separately. For example, the list of preferred sites could read:
